

Conflict Minerals Report

This is the Conflict Minerals Report (“CMR”) for RADA Electronic Industries Ltd. (“RADA”, “we” or “our”), filed with the SEC pursuant to Rule 13p-1 under the Securities Exchange Act of 1934 (the “Rule”) for the reporting period from January 1, 2020 to December 31, 2020. The Rule was adopted by the SEC to implement reporting and disclosure requirements related to Conflict Minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act). The Rule imposes certain reporting obligations on the Securities and Exchange Commission (the “SEC”) registrants whose manufactured products contain Conflict Minerals that are necessary to the functionality or production of their products. “Conflict Minerals” are defined as cassiterite, columbite-tantalite, gold, wolframite, and their derivatives, which are limited to tin, tantalum, tungsten, and gold (“3TG”) for the purposes of this assessment.

As permitted by the Rule and the SEC, this report has not been subject to an independent private sector audit.

Company Overview

We are an Israel based global defense electronics company. We specialize in the development, manufacture, marketing and sales of tactical land radars for defense forces and for critical infrastructure protection applications, and military avionics for manned and unmanned aircraft.

Supply Chain and Product Overview

The 3TG conflict minerals which are deemed necessary to the functionality of our products:

- **Tin** is used for electronic components soldering.
- **Tantalum** is used in various capacitors.
- **Tungsten** used in our products in 2020.
- **Gold** is used for internal wiring in components, as coating in Printed Wiring Boards (PWB's) and mechanical parts.

RCOI

In order to conduct a Reasonable Country of Origin Inquiry (“RCOI”) on the source or origin of conflict minerals that are necessary to the functionality or production of our products, we adopted the OECD Due Diligence Guidelines for responsible supply chain of minerals from Conflict –Affected and High-Risk Area, to determine RCOI.

In accordance with the Rule, we undertook due diligence on the source and chain of custody of the Conflict Minerals that were necessary to the functionality or production of its products during 2020. There is significant overlap between our RCOI efforts and our due diligence measures performed.

Due Diligence

Management Commitment

Our Conflict Minerals control team, first assigned in 2013, has taken the following measures:

Reaffirmed the Conflict Mineral Policy and communicated it in our internet website and to our suppliers. Our policy can be accessed at: <https://www.rada.com/governance>

- a. The policy emphasizes our commitment to the control of the conflict minerals, including measures to be taken against suppliers that fail to report properly.
- b. Monitored the action and progress of the program.

Conflict Minerals Control program

- a. The conflict minerals control team consists of:
 1. Quality Management - Team Leader
 2. Senior Buyer - Team member
 3. Components Engineer - Team Member
- b. Program steps and status:

No.	Activity	Status	Notes
1.	Communicate to manufacturers their requirement to report the status of 3TG minerals usage in their products.	Letter and report templates were sent to manufacturers	
2.	Risk Analysis	We have analyzed the supply chain tiers, identifying the potential high-risk manufacturers. ("High risk" means that they have not provided the required data, or have provided erroneous information)	Repeated requests were sent to the "high risk" manufacturers.
3.	Gather and analyze information	Data received from manufacturers in form of EICC CMRT Excel reports was analyzed and accumulated into the CMR.	About 81% of the manufacturers provided the data in an analyzable format. Others have sent only policy and oral declarations.

4.	Study and updates	Attended Seminars and Webinars on the subject and following updates	
----	-------------------	---	--

minerals originated in the Covered Countries (countries defined as having an internationally recognized border with DRC and include Angola, Burundi, Central African Republic, Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia), and if so, whether the 3TG minerals were from recycled or scrap sources, financed conflict in the Covered Countries or did not finance conflict in the Covered Countries. Therefore, as explained, we have not been able to identify all of the facilities from which our 3TG Suppliers sourced the 3TG minerals. Based on the results of our due diligence thus far, we believe it is likely that years of engagement and communication of expectations through many tiers of the supply chain will be necessary before information returned to downstream companies, such as ours, may be considered accurate and complete.

Improvement Plan

Subject to requirements pursuant to the Rule, we are taking and will continue to take the following steps to improve the due diligence conducted to further mitigate risk that the necessary conflict minerals in our products could directly or indirectly benefit or finance armed groups in the Covered Countries:

- a. Including a conflict minerals clause in all new and renewing supplier contracts.
- b. Continuing to drive our suppliers to obtain current, accurate, and complete information about the smelters in their supply chain.
- c. Follow up in 2021 on smelters requiring risk mitigation, but not removal from our supply chain.

Cautionary Statement about Forward-Looking Statements

Statements in this Conflict Minerals Report, which express a belief, expectation or intention, as well as those that are not historical fact, are forward-looking statements, including statements related to our compliance efforts and expected actions. These forward-looking statements are subject to various risks, uncertainties and assumptions, including, among other things, our customers' requirements to use certain suppliers, our suppliers' responsiveness and cooperation with our due diligence efforts, our ability to implement improvements in our conflict minerals program and our ability to identify and mitigate related risks in our supply chain. It is possible that the COVID-19 shut-down has also impacted the quality and number of supplier responses to our conflict minerals inquiries. If one or more of these or other risks materialize, actual results may vary materially from those expressed. For a more complete discussion of these and other risk factors, see our other filings with the Securities and Exchange Commission, including our Annual Report on Form 20-F for the year ended December 31, 2020. We caution that undue reliance should not be placed on these forward-looking statements, which speak only as of the date of this report, and we undertake no obligation to update or revise any forward-looking statement, except to the extent required by applicable law.
